**MALOSSI**

## Malossi Power Exhaust High Performance Exhaust Systems

A significant re-styling for the legendary scooter that left its mark in history.

Two new projects designed for collectors and enthusiasts of high quality machines.

The already outstanding cylinder /head, known as C.V.F., and the reed valve intakes were the focal points for the evolution of the steel-bodied scooter. Within Malossi, there was a strong desire to add to them a special series of exhausts.

The new POWER EXHAUST, sport exhaust systems, re-designed for high performance, with modern and aggressive styling.

Innovation and creativity is part of Malossi's DNA, product improvement and constant development are our strong points, this is why our products are so long lasting and well remembered by our admirers.

For us, "Made in Italy" is our inspiration.
