## For original filter box

### RED SPONGE

Self-extinguishing, expanding polyurethane filter elements with an increased air and filtering capacity, designed for sporting applications. You can recognize Red Sponge immediately by its distinctive Malossi red color and the yellow trademark. Increased thickness with calculated porosity; optimum filtering characteristics when dry which can be improved by moistening with Malossi oil for filters 7.1 Racing filter oil Full Synt; selected material produced exclusively for specific use. Perfectly interchangeable with the originals they are especially suitable for high-performance engines.

### DOUBLE RED SPONGE

Filter with **double layers**; the first layer has medium sized micro-pores to capture coarse dirt particles, while the second layer has very fine sized micro-pores to capture microscopic dust particles, the most damaging. Filters made of polyurethane foam, self-extinguishing, two layers coupled by a special hot forming process that does not alter its filtering characteristics. The first layer is made of a red filtering media: open cell polyurethane foam with a porosity of 45 ppi (*pores per inch*). The second layer is made of a black filtering media: open cell polyurethane foam with a porosity of 60 ppi (*pores per inch*).

*Sheets for producing custom filter elements.*
